GSB NEWS

Now available: Environmental Product Declarations

The German Aluminium Association e.V. (GDA) has compiled Environmental Product Declarations (EPDs) in collaboration with Aluminium-Laufen AG Liesberg, apt Extrusions GmbH & Co. KG, apt Extrusions B.V., Hydro Extrusion Nenzing GmbH, OTTO FUCHS KG and with support from GSB International e.V.

The EPDs are published by the Institut Bauen und Umwelt e.V. (IBU).

The EPDs contain information on the environmental and sustainability characteristics of the products. In addition, the interested reader can find out about the areas of use and relevant definitions. The EPDs also provide the basis for building certification systems. The EPDs are thus addressed to representatives of all professional groups whose fields of activity are affected by the subject of building certification systems – for example architects, planners, building owners and manufacturers of a wide variety of components.

The EPDs were published in German only. In the attachment of this mail you will find the English translations. Legally valid, however, are only the German versions, which you can download from the following links:
